Software Engineer | Machine Learning Researcher | B-permit Swiss Resident

Education

Sep'17-Jun'21 **ETH Zürich – PhD in Machine Learning & Computer Science**.
Thesis: "On Training Deep Generative Models with Latent Variables", supervised by Prof. Dr. Joachim M. Buhmann.
Research areas: Generative modeling of text and images, Representation learning, Deep learning for biology, Causality.

Sep'13-Jun'16 **ETH Zürich – MS in Computer Science**.
Specialized in software engineering, distributed computing and machine learning.

Sep'09-Sep'13 **University of Belgrade – BS in Electrical Engineering & Computer Science**.
Specialized in software/hardware engineering and design.

Work Experience

Feb'17-Present **ETH Zürich, Institute for Machine Learning – Research Scientist**.
- [Python/PyTorch] I led a team of researchers to develop a web platform that uses convolutional neural networks to recognize sleep patterns from brain signals (`sleeplearning.ethz.ch`). It is used daily by researchers worldwide.
- [Python/PyTorch] I invented a type of a neural network for realistic image synthesis (`github.com/djordjemila/sdn`).
- I was actively involved in numerous interdisciplinary collaborations including the following projects:
  - *Zurich Exhalomics* (`hochschulmedizin.uzh.ch/zurich-exhalomics`) – I led a team of students to develop a tool that automatically calibrates mass-spectrum of human breath, and also a machine learning algorithm to detect causal relations between different metabolites in human body and sleep stages (relating metabolism to sleep).
  - *Sleep Loop* (`sleeploop.ch`) – I developed an algorithm to recognize human sleep stages from wireless device recordings.
  - *VirtaMed collaboration* (`virtamed.com`) – I developed a machine learning tool that can automatically assess the performance of surgeons on a virtual surgery simulator.

Sep'18-Dec'18 **Max Planck Institute for Intelligent Systems – Research Scientist**.
- I worked on causality. I applied causal reasoning to generative models based on deep neural networks.

Sep'16-Feb'17 **Logitech Europe S.A. Data Science & Advanced Analytics – Software Engineer**.
- [Python/SQL] I used machine learning to analyze user logs to improve understanding of product utility.
- [Java] I used natural language processing algorithms to analyze opinions from Amazon reviews, for product enhancement.

Jan'16-Sep'16 **Disney Research Zürich, Vision and Sensing Research Group – Research Scientist**.
- [Python/C++/Matlab/Blender/HTML/CSS] I designed an algorithm to identify mechanical wears in Disney robots (animatronics). Machine learning algorithm was employed to provide human-like robot-degradation assessment.

Skills

General Computer Vision, Natural Language Processing, Deep Learning, Algorithms & Data Structures, Operating Systems

Proficient in Python, PyTorch, C, C++, Java, Matlab, Latex, Bash, HTML, CSS, Javascript

Experienced in Hadoop MapReduce, C#, Javascript, NodeJS, Ruby on Rails, Torch, SQL, Pascal

Frameworks Linux, Microsoft Windows, Microsoft Office, Git, Docker, OpenCV, Pandas, Scikit-learn, Django, Kubernetes

Languages

Serbo-Croatian (Native), English (Fluent), German (B1), Spanish (Beginner)

Academic Activities

Dec'19 NeurIPS 2019 – I co-organized the "Disentanglement Challenge" (`bit.ly/36bTD4W`)

2017-2019 Reviewer at NeurIPS, ICML, ICLR

Selected Publications (full list is available at `https://djordjemila.github.io/#publications`)
